

MEET YOUR  
HONORABLE MENTIONS

**Integrity**

**Condon-Johnson & Associates**

2022

The mainline belowground investigation at Milepost 781 is one of the most unique scopes of work introduced to TAPS since construction. In its first year as a lead contractor for this major maintenance project, CJA exceeded Alyeska's expectations. They safely executed in a high-pressure, high-production, high-quality work environment while elevating leadership, communication, teamwork, environmental protection, financial stewardship, and efficiencies.
